

NISHANT MAURYA

ABOUT ME = { BACKEND DEVELOPER }

Backend-focused Computer Engineering student with hands-on experience in full-stack architectures and client consultancy. Skilled in building scalable APIs (Django), optimizing database schemas (PostgreSQL), and orchestrating background task queues (Celery/Redis). Proven problem-solver with 8+ hackathon wins and a passion for deploying production-grade, real-world systems.

EDUCATION

- B.E Computers(THIRD YEAR) - Fr. Concecio Rodrigues College of Engineering,Bandra(W)- **9.0 SGPA**
- MHT CET -Maharashtra - PCM - **97.57%ile**
- H.S.C - Queen Mary's Junior college, Mira Road(E) - PCM - **89.33%**
- S.S.C - Holy Cross Convent School, Mira Road(E) - **83.80%**

TECHNICAL SKILLS

- Programming Languages:** Python, Dart, C
- Backend Technologies:** Django, Django REST Framework,Celery, Spring Boot
- Frontend Technologies:** Flutter, HTML, CSS, JavaScript
- Databases:** MySQL, PostgreSQL, Firebase, Redis
- Libraries & Tools:** Docker, OpenCV, NumPy, Matplotlib, Tkinter, Cryptography, Docker
- Other Tools:** Advanced MS Excel, Antigravity, Google Stitch, Copilot, OpenClaw, Ollama.

SOFT SKILLS

- Leadership and Team Management
- Effective Communication and Team Collaboration
- Problem-Solving and Critical Thinking

ACHIEVEMENTS

8 Hackathon Wins | 21 Finalist Positions

- Winners**, Saboo Siddik College, WEBATHON 2024.
- Second runner up**, KJ Somaiya, CODE ODYSSEY.
- Winners**, NIT Raipur.
- Winners**, 250\$ bounty organsied by Tech Influencer @roshanvadassery
- Finalists**, **SIH 2024** .
- Second Runner up**, Vasantdada Patil college, QUASAR.
- Winners**, Fr. CRCE, Prkalp-IKS Edition.
- Winners**, Sandip University Nashik, Sunhacks 2025.
- Winners**, SIH 2025, Ramaiah University,Bengaluru.

PROJECTS

1. SplitKar | Flutter, Django, PostgreSQL

- Developed a full-stack expense management application for group expense tracking.
- Designed scalable REST APIs using Django.
- Implemented Google Authentication and group management features.

2. Mitrai | Django, PostgreSQL, Celery, Redis, Telegram

- Developed an AI-driven chat platform featuring JWT/OAuth-secured REST APIs and Google GenAI integration to generate persona-based responses from conversation data.
- Engineered scalable background task pipelines using **Celery** workers and **Redis** to handle data importing and chat analysis.
- (Pitch Deck)

3. MentorConnect | Django, PostgreSQL

- Digitized the mentoring process to eliminate offline paperwork, building robust database models and analytics features to track student performance.
- Currently used by the Computer Engineering Department at Fr. CRCE.

4. GamiFied Platform (SIH 2024) | Web Technologies

- Designed the database architecture for a web gaming platform, integrating 6 mini-games from multiple contributors into a unified leaderboard system also Developed Samvidhan Setu and Hangman mini-games.

5. Agnel Trade Test & Training Portal | Django, PostgreSQL, Celery, Redis, Cloudflare R2

- Developed a candidate assessment portal live at atrtc.cloud under my company 4iStudios as a student-led college consultancy project for the Agnel Trade Test Center.
- Built a secure role-based workflow (Office, Assessor, Validator) utilizing AES-256 signature encryption, dynamic PDF certificate generation and automated SQL/Excel backups to Cloudflare R2 via Celery.
- Protected candidate portals using rate-limiting, custom 429 handlers, and CAPTCHA validation.
